

Jad Naaymi

Salesforce Consultant | Software Developer

Beirut, Lebanon | +961 71 526 060 | Jadnaaymi1@gmail.com

Professional Summary

Results-driven Salesforce Consultant and Software Developer with over 3 years of experience delivering CRM solutions, system integrations, and scalable cloud applications. Strong expertise in Salesforce Lightning Web Components, Apex, and Experience Cloud, with additional hands-on experience in web and mobile development. Recognized for training new customers, improving user adoption, and continuously self-learning modern technologies such as React and Vite.

Core Skills

Salesforce: Apex, Lightning Web Components (LWC), Visualforce, SOQL, Flows, Experience Cloud

Web: JavaScript, HTML, CSS, React, Vite, Bootstrap, Ajax

Mobile: Flutter, Dart, MVVM, GetX, Provider

Tools: GitHub (Version Control), CI/CD Deployment, REST & SOAP APIs

Databases & Backend: Java, PHP, MySQL

Professional Experience

Salesforce Consultant – Ei-Technologies MENA (Jan 2023 – Present)

- Developed reusable Lightning Web Components to enhance performance and scalability
- Designed and implemented complex Salesforce Flows to automate business processes
- Integrated Salesforce with third-party systems using REST and SOAP web services
- Designed and configured Salesforce Experience Cloud portals
- Collaborated directly with clients to gather requirements and deliver tailored solutions
- Acted as a trainer for new coming employees, increasing Salesforce adoption and efficiency

Mobile Developer (Flutter) – Sendibad Express (Oct 2021 – Nov 2022)

- Implemented MVVM architecture for scalable and maintainable mobile applications
- Developed Flutter applications using GetX and Provider for state management
- Built responsive and high-performance user interfaces

Web Developer Intern – Hero-Technology (Jan 2022 – Jul 2022)

- Developed responsive front-end interfaces using HTML, CSS, JavaScript, Bootstrap, and jQuery

- Designed and maintained SQL databases
- Ensured cross-device compatibility and performance

Self-Learning & Projects

- Self-learned React with Vite, focusing on modern frontend architecture.
- Built reusable components and applied best practices in GitHub version control.
- Applied CI/CD deployment concepts for automated builds and releases.
- Worked extensively on a Salesforce Leasing Accelerator project, customizing business logic, data models, and user flows to support leasing processes and improve operational efficiency.
- Designed and developed an end-to-end Salesforce eCommerce solution using Experience Cloud, integrated with Sales Cloud and Service Cloud to manage customer journeys, sales processes, and post-sales support.
